

Greenhall Nursery

LITERACY

1. Introduction
2. Reading
3. Writing
4. Dyslexia
5. Assessment, recording & reporting
6. Monitoring Effectiveness
7. Equal Opportunities

1. Literacy

Literacy is divided into two aspects:

1. Reading
2. Writing

Although learning for young children is very much concerned with the integration of areas of learning and is often centred around a theme, nevertheless it is important within this area of learning that planning focuses on the individual components in order to ensure that -

- a) skills specific
 - b) knowledge specific
 - c) language specific
- elements of each aspect are addressed.

As the children attending the nursery present with a very wide range of physical, learning and language abilities they will obviously access learning experiences and activities in very different ways - planning and assessment will therefore need to take account of individual learning needs. Some children will be operating on a sensory level where activities such as sensory stories need to be repeated and their reactions to these closely monitored. Other children will have restricted physical abilities and be unable to access books independently, but otherwise may enjoy and benefit from a wide range of stories and books and be able to answer comprehension questions, responding using a variety of means e.g. verbally, communication books, pointing to symbols. Some children will have a combination of all of these areas of limitation and the teacher's skill will be in providing activities that offer learning experiences for all of the children.

The nursery environment should be literacy rich with words, symbols and objects of reference used to enhance displays of children's work.

Literacy has specific links with physical development and some activities within the area of Literacy require certain physical pre-requisites, although specialist equipment, strategies and interventions will be employed as appropriate to ensure that children's physical abilities do not impact their ability to show learning and development in literacy.

Where appropriate and reflecting the age and stage of development, the DfES Letters and Sounds programme should be used in the teaching of literacy skills.

2. Reading

This aspect of the Literacy curriculum can be further dissected into four distinct areas: enjoyment, comprehension, participation, phonic knowledge. It is important to note that some literacy skills rely on aspects of development that some children may not be able to exhibit because of existing difficulties e.g. answering questions about stories verbally. Adults must therefore provide opportunities and resources appropriate to the children for them to be able to demonstrate these skills.

Enjoyment

The first step towards reading is to foster a love and familiarity with books and stories. Children need to be part of a reading environment that capitalises on opportunities to promote reading as an important skill for every day life.

BOOKS- Children should be given access to a wide range of books and stories from a very early age. Children at the earliest stages of development will enjoy looking at books and printed materials with familiar people. They will handle books and printed materials with interest and may have favourites. It is important that not only is there a wide variety of genres available but that the children are given the opportunity to interact with books regardless of their difficulties. Some children who have sensory impairments may need visually striking books. Children may need facilitation to turn pages, with board books making this easier for them to learn page turning initially. For children with visual impairment it is important that books with different textures represent the textures realistically, and that they have access to VI books and Objects of Reference.

At the 16-26 months stage of development children may be able to identify their favourite book. They could do this by choosing the book from the book corner, choosing from a symbol board or their own individual methods, or reacting with vocalisations or facial expressions when shown the book / props / hear the name of the book. Children may initially need support to access books, becoming more independent as they develop. They will learn to handle books carefully, holding them the correct way up and turning pages one at a time. However, children's ability to understand books and their knowledge of conventions of books e.g. when to turn pages, may be greater than their physical ability to do so.

We also have a well stocked library which children can access, aswell as a lending library where children can take home a book for a week and then exchange it.

STORIES- Children must be given access to stories relevant to their stage of development and that are presented appropriately to their ability. Children with sensory difficulties should be given opportunities to listen to and interact with a variety of sensory stories that include simple sentences and opportunities to engage with a variety of sensory materials and props. Observation of the children during these sessions is vitally important in order to measure progress

in relation to their understanding e.g. do they show signs of anticipation, recollection, enjoyment? Do they recognise a prop used in the story?

Comprehension

Children should learn that objects, words, pictures and symbols can communicate meaning and provide information. For some children this may mean recognising their name / symbol used to identify their own belongings. For example, a child with a Visual Impairment may have a tactile object attached to their photo to enable them to recognise their photo card. Symbols / words / objects of reference may also be used for timetables, objects and activities and children's attention should be drawn to these. Children should be aware of the way stories are structured and then begin to use this to inform their own verbal or written stories, given the appropriate means to do so. Children that are unable to speak or write should be given the opportunities to create / sequence / answer questions about stories using alternative methods such as technology, symbols, communication boards and pictures / photographs.

The important conventions of stories e.g. characters, setting, events, endings should be taught and children given opportunities to use these in their own work, including role play and small world play. Puppets, props and puppet theatres play an important part in children's ability to tell and retell stories, and can give adults an insight into the comprehension abilities of those children who are unable to answer specific story based questions.

Participation

Children should be given opportunities to participate in literacy activities at their own stage of development. This may include children vocalising during a sensory story, or perhaps using a switch to join in a repeated refrain during a story with props and prompts.

Rhyming stories and those with repeated refrains should be a regular part of story time with the children, giving the children opportunities to become familiar with rhyme and rhythm. Repeated refrains allow the children the opportunity to join in with a familiar phrase. Some children may not be able to say the actual words but could repeat the intonation of the refrain, or use a switch to communicate.

Children should also have the opportunity to engage in activities involving rhyme and alliteration, participating as appropriate e.g. putting all animals beginning with the same sound on Bertha Bus e.g. cat, crocodile, cow.

Phonic knowledge (link to writing)

When appropriate to the child's stage of development he/she will begin to follow the Read Write Inc phonics programme used at Greenhall. Taught in discrete phonics sessions, children learn the first 30 sounds and how to apply them in their everyday literacy. When each set of sounds has been learnt (typically in groups of 6) the children practice their ability to blend the letters to read CVC words.

Children are given the opportunity to

1. Share books with an adult, with the adult drawing their attention to letters on the page.
2. Read storybooks and non-fiction books closely matched to their developing phonic knowledge. They show that they comprehend the stories by answering 'Find It' and 'Prove It' discussion questions
3. Take home Phonics storybooks to share with a reading record book for both staff and parents to comment in
4. Read with fluency and expression, informed by the wide range of books and stories they have been exposed to
5. hear and say the initial sounds in words, consolidating this knowledge through a variety of games and activities.

Children are also taught to read words that they are unable to decode using their phonic knowledge e.g. said, the, I, here, who.

A wide variety of books is available from non-words picture books, to books containing multiple sentences. These will be used as appropriate to support children's reading skills and their stage of phonic/ reading development.

Sources of experience within reading

1. Pre-reading activities
 - Tracking (objects, lights on a screen)
 - matching object to object
 - matching object to picture
 - matching shape to shape
 - matching symbol to symbol
 - story sequencing
 - visual discrimination
 - auditory memory
 - familiarisation with books / symbols / pictures
 - photo recognition
 - auditory discrimination
2. Reading / phonics activities
 - listening skills
 - recognition of letters
 - relationship to letter sound
 - blending and segmenting
 - whole word recognition
 - initial sounds
 - final sounds
 - CVC/CVCC words
 - Familiar words in the environment e.g. names / labels

3. Writing

Writing is an important part of communication as children develop. In the later stages of early years development it is directly linked with children's phonic knowledge and ability.

'Children's later writing is based on skills and understanding which they develop as babies and toddlers. Before they can write, they need to learn to use spoken language to communicate. Later they learn to write down the words they can say'

However, children at Greenhall may be given opportunities to use alternative methods of recording, along with their alternative methods of communication e.g using technology such as clicker, ipads, symbols to 'write' and communicate meaning. Alternative methods of recording will be based on both the children's individual physical skills and their stage of development in reading and communication.

It is important to note that in the early stages of children's development (Birth to 26 months) children will 'mark make'. This is not the same as writing. It is a sensory and physical experience which children do not yet connect to forming symbols which can communicate meaning.

Children should be given opportunities to make marks in a variety of sensory materials using all of their bodies (link to Physical Development). Children need to be provided with physical development opportunities that develop their ability to control their bodies and use their hands effectively for mark making, developing their hand-eye co-ordination (see Physical Development policy).

Early mark making- this can involve any part of the child's body and any sort of material- imagination is the only limit!

Ideas for sensory mark making materials include:

- Foam
- Sand
- Gloop – Cornflour and water
- Custard
- Silly putty
- Playdough
- Lentils
- Rice
- Sawdust
- Soil
- Wet mud
- Glue spread on a surface & sprinkled glitter
- moon sand
- Paint

NB- due care and attention must be paid in regards to health and safety

Ideas for surfaces that could be used for sensory mark making include

- Sandpaper - Waxed crayon
Clay
Notepads
Paper
Windows
Tiled walls
Paper tissues - Felt pens and water
Mirrors
Table tops
Sheets of foil
bubble wrap
corrugated card

:

Items that could be used for mark making at all stages of development (with or without facilitation) :

- Pencils
Pens
Crayons
Chalks
Pastels
Paintbrushes
Toothbrushes
Combs
Ice cubes
Frozen Paints
Cotton buds
Small car wheels
Cotton reel rolling
Dish mops
Scouring pads
Fir cone
Glue sticks
Fingers
Toes
Hands
String of beads
Rope
Cord
Wool
Ribbon
String
Tinsel
Twigs
Plant stalks - straw
Paint rollers
Highlighter pens
Droppers
Squeezy bottles

Later stages of mark making - Sometimes marks are made for the pure physical enjoyment of the activity – the feel of the felt-tip pen as it glides over the surface of the whiteboard or the chalk as it grates over the bumpy tarmac, the sight of the brightly-coloured dribbles of paint as they run down the paper on the easel, or the sensation of the glue, oozing between children’s fingers as they spread it over the paper. On these occasions children have no interest in an end product at all; the physical activity is an end in itself and an opportunity for them to experiment and explore with their senses, developing confidence and dexterity through the process.

As children develop they begin to distinguish and ascribe meaning to the marks that they make. Although an adult may not be able to recognise what the children have drawn / written, the important detail is that the children themselves are able to do so.

When appropriate to the child's stage of development he/she will begin to follow the Read Write Inc phonics programme. Taught in discrete phonics sessions children learn the first 30 sounds and how to apply them in their everyday literacy. This programme encompasses both reading and writing. The children learn to write the letters/letter groups which represent the sounds, to learn to write words by saying the sounds and graphemes, to write simple sentences, to compose stories based on picture strips and to compose a range of texts using discussion prompts.

Writing is closely linked to reading. Children should be given opportunities during their play and story sessions to encounter a wide variety of writing for different purposes e.g. shopping lists in role play, labels around the environment, captions for story pictures, before they are expected to write these.

The physical act of writing is linked closely to physical development. Children practice, use and refine their fine motor skills as detailed in the Physical Development policy. However, alternative methods of recording may be used for children where it is deemed appropriate. This may include alternative technologies, typing, Clicker, use of the iPad.

Links to other areas of learning

- Physical Development
- Communication and Language
- Understanding the World

At Greenhall we aim to provide a literacy rich environment, appropriate to the children’s age and stage of development. Literacy skills are modelled and careful consideration is given to planning appropriate learning experiences to promote development.

4. Dyslexia

Greenhall Nursery endeavours to meet the diverse needs of its pupils to ensure inclusion for all. All of our pupils are entitled to a broad, balanced curriculum, delivered in a relevant and differentiated manner, enabling progression and continuity to be experienced.

We promote equal opportunity for all children regardless of gender, age, religion, culture, ethnicity or ability. In order to meet the needs of all of our children we have achieved entry level DFS and are working towards Full 'Dyslexia Friendly Schools status.' We acknowledge that our children are very young and also have additional needs, predominantly physical difficulties. Because of this they may not show the traditional indicators of dyslexia e.g. letter reversal, but they may show dyslexic tendencies in all areas of the curriculum. We believe that being a dyslexia friendly school will not only benefit children with dyslexic tendencies but will also have a significant impact on other pupils whose Literacy skills are not appropriate to their age, as strategies that are good for the dyslexic learner are good for everyone. For more information please see our dyslexia friendly policy.

5. Assessment, recording & reporting

Children's progress is recorded on session evaluations and used to inform future planning. Annotated photographs and observations are kept in the children's individual learning journeys. Reference is made to the aspect of Literacy as well as the child's age and stage.

Children's Literacy skills are assessed using the EYFS and B-Squared EYFS assessment tool on entry to provide a baseline and then each term. This is reported to the Headteacher and data is analysed with regards to progress made at the end of each academic year although information is gathered on trends at the end of each term.

At the end of their reception year, children are assessed against the Early Learning Goals in line with National Regulations.

5. Monitoring Effectiveness

The coordinator for Literacy at Greenhall is Eleri Holmes. She will monitor the effectiveness of the policy together with the link Governor, Rod Goldthorpe. They will then report back to the Headteacher and Curriculum Committee.

6. Equal Opportunities

This policy should be read in conjunction with the Equal Opportunities Policy.
